

FOR NHS TRUSTS, ICBS & HEALTH BOARDS

NHS Capacity & *Pricing Pack*

Insourced and outsourced clinical capacity across all medical and surgical services — consultant-led, CQC-regulated and priced from 80% of NHS tariff. Everything a planning, operational or finance team needs to evaluate The Vesey as a capacity partner.

From 80% of tariff

Insourced activity, priced per delivered case or session — no set-up fees

All specialties

Full medical and surgical scope — clinics, diagnostics and procedure lists

5 NHS trusts

Our teams have delivered services with George Eliot, UHB, UHCW, UHL and Hull

7-day hospital

CQC-regulated site of our own, open 8am–8pm every day of the week

A hospital-grade partner, minutes from your patch

The Vesey is a CQC-regulated private hospital in Sutton Coldfield, in the NHS Birmingham and Solihull ICB catchment. We run consultant-led outpatient, diagnostic and procedural services seven days a week at our own site — and we deploy the same credentialed, consultant-led teams into NHS hospitals as an insourcing partner. Out-of-hours operating is not a special programme for us; it is how our hospital already works, every week.

CQC-regulated

Location ID 1-11527097165 · regulated for treatment of disease, disorder or injury.

4.87 / 5 patient rating

From 700+ independently verified reviews on Doctify.

Open 7 days, 8am–8pm

Evening and weekend capacity as standard, with free on-site parking.

02 · TWO WAYS WE ADD CAPACITY

Insourcing and outsourcing — one partner, both levers

MODEL A — INSOURCING

Our teams, your hospital

Consultant-led teams deliver **all medical and surgical services** inside your own facilities — outpatient clinics, diagnostics, theatre and day-case lists — during evenings, weekends and unused sessions. Patients stay on your site and pathway, under your clinical governance.

Priced from 80% of NHS tariff. Pay only for delivered activity.

MODEL B — OUTSOURCING

Your patients, our hospital

Transfer cohorts to The Vesey for **all medical and surgical services** on an outpatient and day-case basis — with procedures delivered under **local anaesthetic as day cases**. We contact and book every patient; results and letters flow back to your team.

Cost-per-case pricing agreed against tariff — no set-up fees.

	Insourcing — at your trust	Outsourcing — at The Vesey
Best when	Estate free out of hours, workforce constrained	Estate itself is the constraint
Scope	All medical & surgical services, incl. theatre lists in your facilities	All medical & surgical services; procedures LA day-case only
Governance	Your registration & framework — we evidence everything	Our CQC registration & clinical governance
Commercials	From 80% of tariff, per session or case	Cost per case, agreed against tariff
Mobilisation	Typically weeks	Days–weeks — no estate build

Consultant-led capacity inside your own hospital

What we deliver on your site

- ✓ **Outpatient clinics** — new and follow-up, run to your templates and outcome forms
- ✓ **Surgical & procedure lists** — theatre and day-case lists in your facilities, under your governance
- ✓ **Diagnostics** — echo, ECG and ambulatory monitoring, spirometry, ultrasound, audiology
- ✓ **Triage & PTL validation** — clinically-led list cleansing; often the fastest first win
- ✓ **Full medical & surgical scope** — every speciality considered, not a fixed menu

How sessions run

- ✓ **Evenings, weekends & unused sessions** — your estate's dark hours become activity
- ✓ **Senior decision-makers in the room** — higher discharge and treat rates per session
- ✓ **Named clinical lead** + operational escalation route for every programme
- ✓ **Your PAS, your records** — our teams document directly into your systems
- ✓ **Weekly reporting** — activity, outcomes, DNA and PTL impact; monthly board-ready summary

INSOURCING PRICING

From 80% of NHS tariff

Priced per delivered session or case against the applicable NHS payment scheme price — a guaranteed saving on tariff, and typically well below internal WLI rates and agency premiums. **No set-up fees. No charge for sessions unfilled through our staffing.** Designed to sit inside your elective recovery funding envelope.

Typical mobilisation — single-specialty pilot

WEEK 1

Capacity call, cohort scoping and clinical model agreed with your specialty leads.

WEEKS 2-3

Contracting; credentialing evidence packs to medical staffing; IG sign-off — run in parallel.

WEEKS 3-4

Rota build around your free estate; clinic templates loaded into your PAS.

FROM WEEK 4

First sessions live. Weekly activity and PTL-impact reporting begins immediately.

Credentialing, evidenced up front: GMC/NMC/HCPC registration, revalidation and appraisal status, enhanced DBS, right-to-work, occupational health, mandatory training and indemnity for every clinician — delivered as a complete pack before any patient contact. We operate a practising-privileges model at our own hospital, so structured credentialing is business as usual.

New capacity at our 7-day hospital

What we take off your list

- ✓ **All medical & surgical services** — outpatient and day-case basis
- ✓ **Procedures under local anaesthetic** — delivered as day cases (no GA, no overnight stays)
- ✓ **On-site diagnostics** — echo (BSE physiologists, consultant-reported), ECG, Holter, ambulatory BP, spirometry, audiometry, ultrasound incl. vascular Doppler, ophthalmic diagnostics/OCT
- ✓ **Bloods** — phlebotomy on-site, processed at accredited NHS laboratories, ~48-hour results
- ✓ **MRI pathway** — 1.5T via our imaging partnership, in-house referral generation

How the patient journey works

- ✓ **You send the agreed cohort list** — that's the extent of your set-up work
- ✓ **We phone every patient** — evening and weekend slots across 7 days, reminders, rebooking
- ✓ **NHS-funded patient principles** — free at the point of care, no private upselling, ever
- ✓ **Results & letters returned** — to agreed timescales and formats, pathway ownership stays with you
- ✓ **Weekly RTT reporting** — contacted, booked, seen, DNA, outcomes, list impact

OUTSOURCING PRICING

Cost per case

Agreed against the applicable tariff for each cohort — transparent, per-patient pricing with **no set-up fees and no minimum-volume traps**. Quoted against your actual cohort within one working day of a capacity call, and designed to sit inside elective recovery funding.

Why attendance stays high

Central Sutton Coldfield location, free parking, evening and weekend choice, and a booking line that's actually answered.

Mobilisation in days-weeks

No estate build, no honorary contracts, no PAS template work on your side. The critical path is the data agreement.

Honest scope

We're an outpatient, diagnostic and day-case facility. If a cohort needs GA or overnight care, we'll say so immediately.

Blend both models from one contract. Many recovery programmes work best mixed: insourced evening and weekend lists in your hospital where estate allows, outsourced cohorts at The Vesey where it doesn't — flexed quarter by quarter as your position changes, from a single relationship and governance conversation.

All medical and surgical services

We provide capacity across the full range of medical and surgical services. The specialties below are indicative of where trusts most often need help – not an exhaustive menu. If your pressure point isn't listed, ask: our West Midlands consultant network is broader than any static list.

MEDICAL SPECIALTIES

- Cardiology
- Dermatology
- Endocrinology & diabetes
- Gastroenterology
- Haematology
- Neurology
- Paediatrics & paediatric subspecialties
- Pain management
- Respiratory medicine
- Rheumatology
- Mental health & psychiatry
- Sports & exercise medicine

SURGICAL SPECIALTIES

- General surgery
- Orthopaedics & hand surgery
- ENT surgery
- Ophthalmology
- Urology
- Gynaecology
- Vascular surgery
- Breast surgery
- Plastic surgery
- Minor operations & skin surgery
- Endoscopic gynaecology
- Image-guided injections

Diagnostics we run in-house

Echocardiography (BSE)

12-lead ECG

24-hr Holter

Ambulatory BP

Spirometry

Audiometry

Ultrasound – MSK / abdo / pelvic

Vascular & venous Doppler

Ophthalmic diagnostics / OCT

Phlebotomy (NHS-accredited labs)

MRI pathway (1.5T, partner site)

Scope rules of thumb. Insourcing at your site: full scope including theatre lists, delivered under your governance. Outsourcing at The Vesey: outpatient and day-case scope, with procedures under local anaesthetic only. Anything genuinely outside scope gets flagged on the capacity call – before it costs anyone a mobilisation.

Governance you can evidence to your board

- ✓ **Complete credentialing packs** per clinician — registration, appraisal, DBS, OH, training, indemnity — before any patient contact
- ✓ **Information governance** — DPAs, UK GDPR-compliant flows, records returned to the trust as pathway owner
- ✓ **Incident reporting & safeguarding** — we work inside your processes when insourcing; ours are CQC-inspected when outsourcing
- ✓ **Named clinical lead** and operational escalation route on every programme
- ✓ **Full indemnity** — medical malpractice and public liability held

NHS organisations our teams have worked with

● **George Eliot Hospital NHS Trust**

● **University Hospitals Birmingham NHS FT**

● **University Hospitals Coventry & Warwickshire**

● **University Hospitals of Leicester NHS Trust**

● **Hull University Teaching Hospitals NHS Trust**

07 · NEXT STEPS

From this pack to patients seen

1 · Book a capacity call

Free, 30 minutes, no obligation. Your specialty, backlog position and constraints — our honest view of fit within one working day.

2 · Receive a scoped proposal

Model, volumes, indicative pricing against tariff, mobilisation timeline and the governance pack for your assurance route.

3 · Mobilise

Insourced pilots typically live in weeks; outsourced cohorts in days to weeks. Weekly reporting from session one.
